pairs we have trained service engineers keep-
ing the pumps of the west country fully opera-

Packaged Pumping Systems

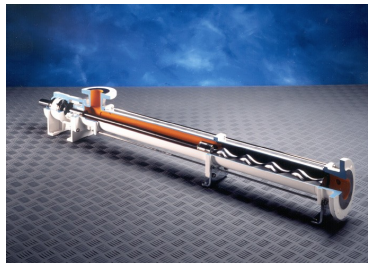

Sewage pumping applications require energy-efficient and reliable equipment that can be installed easily and quickly to meet fast track schedules.

The 3 Packaged Pumping Systems available from Mono, **Grifter Packaged Pump Station**, **Compact Mutrator** and **Munchpump**, can offer you just that.

By combining the benefits of the progressing cavity pumping principle with Mono's efficient macerators, you are buying a package that offers you many advantages against submersible pump sets.

- Small bore pumping for lower installation costs and reduced risk of septicity.
- Above average 'dry' location of pumps with no sump entry risks or hauling pumps out of sumps.
- Low wear rates and optimum running time.
- Duty and standby sewage pumps, integral control, all completely pre-plumbed and 'ready to run'.

**The Mono pump-
ing principle of
scroll and stator
is ideally suited
for the pumping**

**of food materials, oil and
grease, chemicals, sewage, po-
table water and various other
liquids or slurries.**

**For a quotation contact our
sales team who will offer the
technical assistance to over-
come your pumping problems
efficiently and within budget.**
